- 1 - Ozone Tube Pinch Protector (optional use)

Bracket

Tube and Adapters

Ozone Machine

-Over-

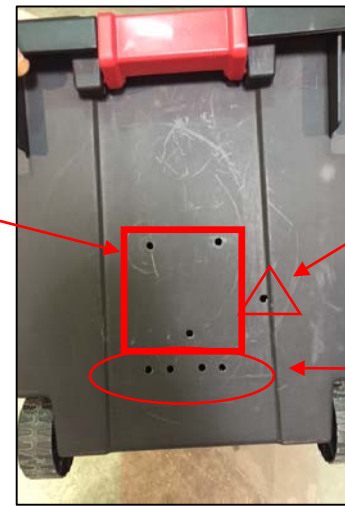

1. Remove Ozone Machine Decal to Expose Pre-Drilled Holes

Inside the tote you will find the ozone machine kit box. Remove the zip ties that attach the box to the inside of the tote.

Three Bracket holes

One Ozone Tube hole

Four Ventilation holes

**Ensure Ventilation Holes remain clear and that the recommended dissipation times are followed to avoid a lingering ozone smell.*

2. Assemble the bracket

Line up the bracket to the three bracket holes and attached by using the pre-threaded screws

3. Position the Ozone Generator on the bracket

The Generator will fit snug onto the bracket and lock into place.

4. Attaching Ozone Tube

Attach the Ozone Tube to the outlet in the Ozone Machine. Then feed the Tube through the hole into the inside of the Tote. This tube feeds the ozone into the Tote.
